CORN SEEDS

terminator variety

CORN SEEDS

Characteristics: An enhanced corn seed specially created to maximise profits. Genetically modified with Terminator technology to produce one harvest only.

Instructions: Requires chemical fertilisers and pesticides to thrive. Not recommended for use as part of a sustainable approach to growing food.

Care: Do not plant near other crops. Terminator genes may contaminate other seeds and make them sterile.

Harvesting: After first crop, seeds are self-terminating and will not grow. For further harvests please purchase new seed stock and chemicals from us.

Precautions: Not suitable for use by impoverished farmers in developing countries.
